PROJECTS

We Travel. -Travel package booking website (on progress)

GitHub: [Link](#) [Live Link](#)

- User-friendly travel package booking website
- Multiple category options: Choose from various travel categories such as adventure, leisure, family, or luxury.
- Attractive locations: Explore enticing destinations worldwide.
- Direct communication: **Chat** with hotel owners to obtain additional information about the accommodations.
- Developed with React: The website is built using the React framework for a responsive and modern user experience.

Technologies Used

- Node.js
- Express.js
- Bootstrap
- Nodemailer
- MongoDB
- Multer
- Razorpay
- EJS
- AWS
- Nginx
- Datatables
- React

PROFILE

A recent graduate passionate about collaborative innovation, seeking opportunities in dynamic teams that align with my skills. Ready to contribute, learn and make a real impact, I'm excited for the journey of growth, discovery, and positive change.

NutriFreshFruit - E commerce website

GitHub: [Link](#) [Live Link](#)

- Successfully developed and launched an e-commerce website for fresh fruit sales.
- Valuable learning experience in web development and design.
- Offers a simplified shopping interface for users to explore and purchase fresh fruits.
- Honed technical skills and gained practical experience.
- Crafted an efficient and user-friendly e-commerce platform.

• Technologies Used

- Node.js
- Express.js
- Bootstrap
- Nodemailer
- MongoDB
- Multer
- Nginx
- Datatables
- Razorpay
- EJS
- AWS

MINI PROJECTS

• **NETFLIX Clone : React**

GitHub: [Link](#)

- Developed a Netflix-inspired mini-project using React.
- Strong emphasis on front-end skills.

• MERN Auth App : React | Redux

GitHub: [Link](#)

- Developed a MERN authentication app with Redux and **JWT** for secure user authentication.
- Implemented robust security measures for enhanced user experience.
- Demonstrated proficiency in full-stack development and authentication protocols.

• AI-Based Finance Health checker

GitHub: [Link](#)

- Developed an Ai-Based Finance Health Checker during a hackathon ,leveraging **OpenAI** for intelligent data analysis and insights generation.
- Utilised React for building an interactive and user-friendly frontend interface. Integrated OpenAI to perform advanced data analysis for assessing financial health.

• OLX Clone : React | Firebase

GitHub: [Link](#)

- Created an OLX clone using React and **Firebase**.
- Demonstrated competence in web development, real-time databases, and API integration through this project.
- Emphasized expertise in front-end development.

EDUCATION

Alagappa University

Bachelor of Computer Applications

Govt.HSS Tirurangadi

Biology Science

2017-2019

- Integrated data fetching to showcase React proficiency for interactive web applications.
- Skillfully integrated the **TMDB API** for dynamic content.

• TODO App : React

GitHub: [Link](#)

- Developed a React-based front end for a to-do list application.
- Demonstrated UI/UX design and responsive web development skills.
- Implemented features for task management and user interactions.

SKILLS

Technical Skills

- | | |
|--------------|--------------|
| • React js | • sql |
| • Node js | • figma |
| • Express js | • javascript |
| • Mongo DB | • Git |
| • Redux | • Aws |
| • Jwt | • Nginx |
| • Firebase | • Html |
| • Bootstrap | • css |
| • postman | • npm |
| • TypeScript | |

Non Technical Skills

- Self Learner
- Work Ethic
- Passionate
- Communication
- Flexibility
- Team Worker
- Adaptability
- Debugging
- Time Management
- Problem Solving
